$$\frac{\pi \sqrt{\exp(-t^2)}}{(x-t)^2 + y^2} dt$$

reel

$$D(z) = \frac{\sqrt{\pi}}{2} e^{-z^2} \operatorname{erfi}(z)$$

$$v(z) = e^{-z^2} \operatorname{erfc}(z)$$

$$V_P(x,y) = \int_{-\infty}^{\infty} G(x';y) dx' = \int_{-\infty}^{\infty} I(x') dx'$$

colorworld

1123456789

A pixelated, black and white image of the text "The first step". The text is rendered in a simple, blocky font. The word "The" is on the left, followed by "first" in the middle, and "step" on the right. The letters are composed of various shades of gray and black pixels, giving it a low-resolution, digital appearance. The background is white.
